Younes Wahyiane

IT SUPPORT ENGINEER | ENDPOINT & WORKPLACE SPECIALIST

Zaventem, Belgium | +32 485 08 16 76 | younes-wahyiane@outlook.com | Driver's license B

PROFESSIONAL PROFILE

IT Support Engineer with nearly 9 years of experience supporting enterprise users in international environments. Strong hands-on background in incident and request management, endpoint deployment, hardware and software troubleshooting, stock and asset management, SCCM, Active Directory, ServiceNow and PowerShell. Experienced in workplace migrations, including Windows 11 deployments and business-critical application installations requiring server-side activation. Customer-focused, calm under pressure and effective in both operational support and project-based work. Currently available for freelance assignments, looking for hybrid work in the Brussels region.

WORK EXPERIENCE

IT Support Engineer
06/2024 – Present

TME | via Computacenter

- Investigate complex Windows 11 logon and authentication issues involving GPSVC, Group Policy, Netlogon, Kerberos and Active Directory connectivity.
- Collaborate with Microsoft support and escalation engineers on advanced Windows investigations, diagnostic collection and validation of potential mitigations.
- Perform advanced diagnostics using Windows Event Viewer, ETW tracing, Procmon, Wireshark, PowerShell, CMD and Microsoft TSS.
- Configure and collect GPSVC, Netlogon, Code Integrity and ACFB diagnostic logs, including persistent boot-time ETL tracing.
- Investigate Domain Controller connectivity, secure-channel authentication, DNS resolution and Group Policy processing.
- Reproduce incidents, compare technical evidence and test configuration changes in coordination with specialist teams.
- Document technical findings and troubleshooting procedures to support structured incident escalation.
- Handle incidents and service requests, providing end-user support and troubleshooting across the workplace environment.
- Manage IT stock and device inventory, supporting hardware availability, allocation and lifecycle activities.
- Delivered a Windows 11 migration project, including workstation upgrades and installation of business applications.
- Coordinated application installations requiring server-side activation to ensure applications were fully operational after migration.

HUB / IT Support Engineer
08/2019 – 06/2024

SWIFT, La Hulpe

- Provided onsite and remote support for hardware, software, network, Microsoft Office, SharePoint, SAP, OneDrive and iOS issues.
- Managed incidents and requests using ServiceNow and Jira; performed PC/hardware replacements, software installations and registry changes.
- Used PowerShell scripts, Software Center, Active Directory and remote-control tools to support and administer endpoints.
- Supported OneDrive and iOS migrations and worked with administrator access in a security-conscious enterprise environment.

Back Office
02/2021 – 06/2024

SWIFT, La Hulpe

- Staged and deployed laptops through SCCM and prepared devices for worldwide shipment.
- Managed IT stock, monitors, cables and device wiping across multiple sites.

3SKey Engineer / Backup 3SKey Engineer
01/2019 – 06/2023

SWIFT, La Hulpe

- Supported customers with installation, modification and troubleshooting of 3SKey security tokens and certificates.

IT Service Desk
01/2018 – 12/2018

Mercedes Europa, Woluwe

- Delivered first-line and onsite support for Windows 7 users, printers and telephony.

PROFESSIONAL PROJECTS

Windows 11 Migration
2024 – Present

TME | via Computacenter

- Migrated end-user workstations to Windows 11 and installed required business applications.
- Handled applications dependent on server-side activation, coordinating the activation step as part of the migration workflow.

Intune Administrator – Client Devices Team
05/2022 – 10/2022

SWIFT

- Migrated company Apple devices from MobileIron to Microsoft Intune and supported users throughout the transition.
- Managed and configured Microsoft Intune device policies and compliance settings.
- Configured password, PIN and device lock requirements.
- Managed device security and access policies.
- Performed remote device actions including Remote Lock, Retire, Wipe and device removal.
- Monitored and managed device compliance.
- Diagnosed and resolved device enrollment, synchronization and policy deployment issues.
- Supported users with Intune-related incidents and device management issues.
- Managed corporate iOS/iPadOS devices through Microsoft Intune.
- Monitored the MobileIron-to-Intune migration progress by exporting and analyzing CSV reports to identify users and devices that had not yet migrated.
- Monitored the Microsoft Intune Admin Center dashboard to identify, analyze and troubleshoot device errors, compliance issues and deployment failures.
